

**Listing of Claims:**

1. (Currently Amended) A recording medium ~~comprising~~  
storing:

unique identification information of the recording medium;  
image information;

5 an information outputting program ~~for outputting~~ which is  
executable by a computer to output images based on the image  
information; [[,]] and

an automatic copying program ~~for~~ which, when the recording  
medium is inserted in the computer, is executed automatically

10 saving by the computer to: (i) save copy information of the ~~image~~  
information and the information outputting program in a specific  
location of the computer, (ii) determine whether or not an

information storage area having identification information that  
is the same as the unique identification information of the

15 recording medium is present in the specific location, and

(iii) if it is determined that no information storage area  
identification that is the same as the unique identification  
information is present in the specific location, to create an  
information storage area having identification information that

20 is the same as the unique identification information of the  
recording medium in the specific location and to save copy  
information of the image information in the created information  
storage area.

2. (Currently Amended) The recording medium of claim 1,  
~~wherein the automatic copying program automatically saves wherein~~  
the copy information of the image information corresponds to a  
part of the image information stored by the recording medium ~~and~~  
~~the information outputting program in the computer at the~~  
~~specific location.~~

3. (Currently Amended) The recording medium of claim 1,  
wherein the specific location is ~~either~~ one of: an internal disk  
of the computer, ~~or~~ an internal disk of another computer that is  
connected to the computer through a network, ~~or~~ and a recording  
5 medium in which information can be stored by a recording  
apparatus that can be connected to ~~the~~ said another computer.

4. (Currently Amended) The recording medium of claim 1,  
~~further comprising: music song audio information; wherein the~~  
information outputting program causes the computer to: display,  
in a selectable manner, ~~the storage location for the storage~~  
5 locations of music song audio information, to acquire desired  
music song audio information from a selected storage location and  
store the acquired music song audio information in the specific  
location of the computer, and to ~~control a computer to function~~  
~~as a simultaneously outputting section to simultaneous outputting~~  
10 simultaneously output images based on the image information and

music song audio based on ~~selected~~ the acquired music song audio  
information. ~~, wherein the automatic copying program to control a  
computer to function as a saving section to automatically save  
copy information of the image information, selected the music  
song audio information, and the information outputting program,  
in the specific location of the computer.~~

15

Claim 5 (Canceled).

6. (Currently Amended) ~~A~~ The recording medium of claim 1  
~~comprising: image information; an information outputting program  
that outputs to the computer images based on the image  
information, and an automatic copying program that automatically  
saves in a specific location of the computer the image  
information and the information outputting program, are stored in  
the recording medium; wherein the image information includes  
plural processed image information having different resolutions.~~

5

7. (Currently Amended) ~~A~~ The recording medium of claim 6,  
wherein the plural processed image information ~~is at least~~  
comprises screen data for display ~~in~~ by a display device.

Claim 8 (Canceled).

9. (New) The recording medium of claim 1, wherein the information outputting program is executable by the computer to perform setting of an image information changeover effect for a slide show using the image information.

10. (New) The recording medium of claim 4, wherein one of the selectable storage locations of the music song audio information is the recording medium.

11. (New) The recording medium of claim 10, wherein the automatic copying program causes the computer to automatically save copy information of the music song audio information in the recording medium in the specific location of the computer.
